

### Investment Objective

To provide a 3x Leveraged Exposure to Bitcoin (the “Underlying Asset”) by holding long positions in bitcoin futures contracts and micro bitcoin futures contracts traded on CME (the “Reference Assets”).

### Key Features

- Opportunity to magnify returns in one simple trade.
- Liquid. Trades like an equity on exchange, with multiple market makers.
- You cannot lose more than the amount you invest.
- An intraday rebalance mechanism (“airbag”) is designed to cushion the largest intra-day falls.
- Simple to trade, no need for futures or margin accounts.
- Transparent structure with full ownership of the underlying assets, so credit risk minimised.
- Independent structure managed by industry experts.

### Key Risks

- Investing in Leveraged ETPs is only suitable for sophisticated traders who understand leverage, daily rebalancing and compounded daily returns.
- Investors can lose the full value of their initial investment (but not more).
- Losses are magnified due to the nature of leveraged returns. Therefore, Leveraged ETPs are only suitable for investors willing to take a high level of risk.
- Daily compounding may result in returns which an investor may not expect if the investor has not fully understood how a Leverage Shares ETP works.
- Due to daily rebalancing and compounding, ETP returns measured over periods longer than one day may differ from the returns of the underlying asset multiplied by the leverage factor.
- Only use these ETPs if you can monitor your positions daily.
- Please see the 'Risks Factors' section of the Prospectus for a more detailed discussion of the potential risks associated with an investment in this product.

Please consult an investment adviser to determine whether or not the products are suitable for you. Traders should also review the Relevant Prospectus (as defined below) and the LS Limited educational materials carefully before considering the ETPs.

## No investment advice

The Base Prospectus is not, and does not purport to be, investment advice, and none of the Issuer, the Trustee, the Arranger, the Authorised Participants or the FCMs make any recommendation as to the suitability of the ETP Securities as an investment.

The information contained in this financial promotion is neither an offer for sale nor a solicitation of an offer to buy securities. This financial promotion should not be used as the basis for any investment decision.

## Risk Warnings

The value of an investment in ETPs may go down as well as up and past performance is not a reliable indicator of future performance. An investment in ETPs is dependent on the performance of the underlying index, less costs, but it is not expected to match that performance precisely. ETPs offering daily leveraged or daily short exposures ("Leveraged ETPs") are products which feature specific risks that prospective investors should understand before investing in them.

Securities issued by the Issuer are products involving a significant degree of risk and may not be suitable for all types of investor. Any decision to invest should be based on the information contained in the Relevant Prospectus of the Issuer (or any supplements thereto) which includes, inter alia, information on certain risks associated with an investment. The price of any securities may go up or down and an investor may not get back the amount invested. Securities are priced in US Dollars/Euros/Pounds and the value of the investment in other currencies will be affected by exchange rate movements.

Short and leveraged exchange-traded products are only intended for investors who understand the risks involved in investing in a product with short and/or leveraged exposure and who intend to invest on a short-term basis. Any investment in short and/or leveraged products should be monitored on a daily basis to ensure consistency with your investment strategy. You should understand that investments in short and/or leveraged exchange-traded products held for a period of longer than one day may not provide returns equivalent to the return from the relevant unleveraged investment multiplied by the relevant leverage factor.

Potential losses in short and/or leveraged exchange-traded products may be magnified in comparison to investments that do not incorporate these strategies. Please refer to the section entitled "Risk Factors" in the relevant prospectus for further details of these and other risks associated with an investment in short and/or leveraged exchange traded products. You should consult an independent investment adviser prior to making an investment in short and/or leveraged exchange-traded products in order to determine its suitability to your circumstances.
